

Paper Flowers

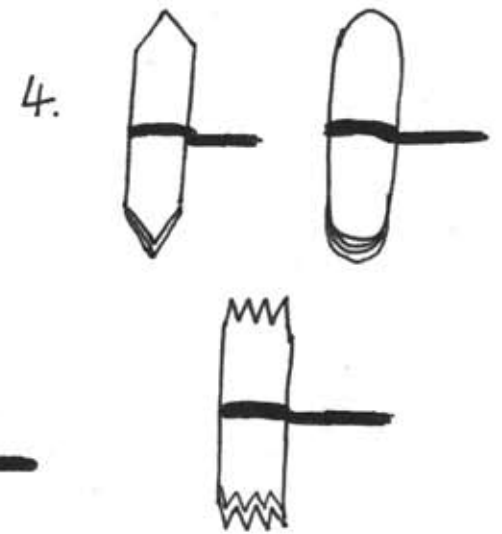

Choose four sheets of tissue paper. They could be all the same colour, or a few different colours.

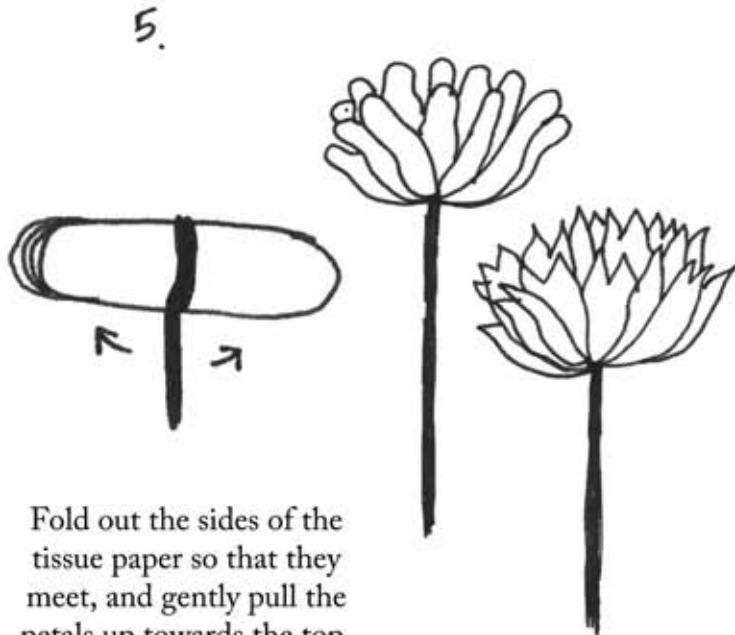

Put them on top of each other, and then fold the sheets up all together like you're going to make a fan

Press the folds together, then wrap a pipe cleaner around the middle, and fasten it around itself.

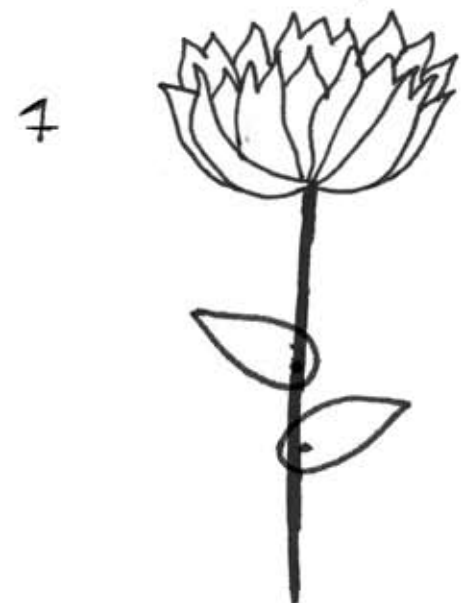

Cut the edges of the tissue paper. Changing the way you cut the edges will make the flower look different.

Fold out the sides of the tissue paper so that they meet, and gently pull the petals up towards the top.

Cut some leaf shapes out of green card. Then poke a small hole in the rounded end with a pencil and push the leaf up the stalk.

You have made a beautiful flower!
